

# ELLIPTICAL TANKS

**Custom Composites has been in business for 38 years serving the needs of fire apparatus manufacturers for the last 26 years. Custom Composites Elliptical tanks are zero maintenance, most versatile size and finish options, lightest, strongest, non-corrosive, lowest center of gravity, ULTRAFLOW baffled, and carry the best warranty in the business.**

**These self-supported two piece, seamless shell tanks with central structure beam design feature a 24" square fill / access tower with hinged lid, NFPA Ultra Flow Kinetic control baffle system, flat base for the lowest center of gravity, three widths, many gallonage sizes, paintable with panels or stainless wrap options, lots of features, many dumps, fills and – like all Custom Composites tanks – our exclusive Limited Lifetime Warranty.**

## **WHY SPECIFY ANYTHING LESS?**
