

Description

Fomtec has a range of mobile monitors to meet our customers various protection needs. From smaller frontal tank and spill fires covered by the Ballista to fully involved modern supertanker fires covered by the Longbow, we have the equipment to get the job done. For more detailed information, please visit our web page for datasheets. You can also contact us or one of our distributors for more information.

Ballista

The Ballista is a lightweight Howitzer-style trailer based monitor capable to 3000 GPM. The unit is designed to be towed by small truck with rapid deployment in mind. All piping on the unit is stainless steel with two 5" Storz inlets provided. Various other inlet options are available as well as unit customization (flowrate, color, electric/wireless control etc.).

Key features

- Nominal Flowrate: 3000 GPM
- Horizontal Range: 90 DEG
- Monitor Size: 6"
- Nozzle: self-ducting (0-3%)
- Trailer Weight w/monitor (approx.): 1500 lbs

Javelin

The Javelin is a fast response mobile monitor trailer nominally rated to 4000 GPM. A stable platform allows the unit 360 degrees horizontal coverage. All piping is stainless steel with four 5" Storz inlets provided. Various other inlet options are available as well as unit customization (flowrate, color, electric/wireless control etc.).

Key features

- Maximum Flowrate: 3500 GPM
- Horizontal Range: 360 DEG
- Monitor Size: 6"
- Nozzle: self-ducting (0-3%) or straight-bore
- Trailer Weight (approx.): 3500 lbs

Crossbow

The Crossbow is a fast response mobile monitor trailer nominally rated to 6000 GPM. A stable platform allows the unit 360 degrees horizontal coverage. All piping is stainless steel with four 5" Storz inlets provided. Various other inlet options are available as well as unit customization (flowrate, color, electric/wireless control, etc.).

Key features

- Maximum Flowrate: 6000 GPM
- Horizontal Range: 360 DEG
- Monitor Size: 6" or 8"
- Nozzle: straight-bore
- Trailer Weight (approx.): 6000 lbs

Longbow

The Longbow is a mobile monitor trailer rated up to 12000 GPM using folding outriggers for extra stability. The extended platform and footprint allows the unit 360 degrees horizontal coverage. All piping is stainless steel with a standard 12" Storz inlet provided. Various other inlet options are available as well as unit customization (flowrate, color, electric/wireless control, etc.).

Key features

- Maximum Flowrate: 12000 GPM
- Horizontal Range: 360 DEG
- Monitor Size: 8" or 10"
- Nozzle: straight-bore
- Trailer Weight (approx.): 8000 lbs
