

HNE riot control units

Technology

The proven HNE fire fighting technology is now available for civil protection. The program consists of 4 models with different filling volume; from 1,5 litres up to 10 litres. All units are easy to refill during the mission. HNE's riot control units are especially designed

for sovereign deployment and feature easy handling and versatile applications. A discharge length of up to 25 m supports the operation from a safe distance. Due to the low weight and the compact backpack all RCUs provide unrestricted mobility.
