

SUPPLIED AIR RESPIRATORS (SAR)

Honeywell North CF4000 Series Front Mount CF-SAR

Honeywell North CF4000 Series Front Mount CF-SAR

Overview

Feedback

The Honeywell North CF4000 Series is a front mount Continuous Flow Supplied Air Respirator (CF-SAR). The CF4000 Series assembly connects to the center port of the Honeywell North RU6500 full facepiece to create a respirator that offers the flexibility of two options: CF-SAR only or CF-SAR with Air Purifying Respirator (APR) backup. It particularly benefits users who require respiratory protection across different respirator types. Together with Honeywell North airline hoses and quick connecting couplers: the CF4000 Series offers a reliable and economic system that provides respiratory protection against most gases: vapors and particulates for extended periods of time.

Features & Benefits:

- Converts easily from CF-SAR only to CF-SAR/APR with no additional expense.
- Front mount breathing tube keeps workers comfortable and productive.
- Approved with Honeywell North RU6500 Series Full Facepiece.
- RU6500 Full Facepiece requires one single fit test for all configurations (APR: PAPR and CF-SAR).
