SEALED EYEWEAR ENGINEERED FOR THE EXTREME

EXTREME ENVIRONMENTS

Some workplaces demand eye protection that performs at a higher level. Places where debris—from dust, to sand, to dirt and soot—combine with wind, sun, heat and sweat to create a challenging environment. Extreme environments like this demand extreme eye protection.

EXTREME WORKERS

Every day, workers in extreme environments are exposed to hazards that can lead to serious injury. And when it comes to vision protection, these workers have specific needs. From oil and gas operations to mining to heavy construction, performance is critical. Workers in these extreme environments deserve extreme eye protection.

EXTREME PROTECTION FOR EXTREME WORKERS AND WORKING CONDITIONS.

After visiting these job sites and talking to workers and safety managers, we heard loud and clear that finding the right eye protection can be a challenge. Workers are exposed to wind, sun, dirt, dust and debris, as well as heat and humidity. Keeping debris out of their eyes while keeping lenses clear of fogging—no matter how hot or intense the work gets—is a must. That's why we created Uvex Livewire sealed eyewear.

Designed from the ground up based on in-the-field research, Uvex Livewire sealed eyewear delivers the fit, performance and protection you won't find anywhere else. It's also available in a prescription frame option to outfit even more of your team. With its precision-designed fit, best-in-class anti-fog lens coating and comfort-engineered materials built into the frame, Uvex Livewire sealed eyewear is worthy of the most demanding environments...and worthy of the hardest working individuals.

AVAILABLE IN THE TOUGHEST COATINGS FOR THE JOB!

PERFORMANCE

Lenses feature proprietary HydroShield® Anti-Fog coating and Uvextreme® Plus Anti-Fog coating.

HYDROSHIELD® ANTI-FOG COATING

- Honeywell Uvex HydroShield® AF technology keeps them consistently fog-free 90X longer than the majority of other anti-fog products.
- Over 180 seconds of fog-free time.
- Requires no application and no maintenance.
- Provides 2X greater scratch resistance than our next best anti-fog coating.

UVEXTREME® PLUS ANTI-FOG COATING

- Certain SKUs are not available with HydroShield® AF coating, but instead are coated with Uvextreme® Plus AF coating. Uvextreme® Plus provides 2X better scratch-resistance* than competitive anti-fog products and 10X the anti-fog performance.
- Top and side channels in the frame are strategically placed and designed for optimal venting to enhance anti-fog performance while keeping out dust and debris.

UVEX HYDROSHIELD® ANTI-FOG COATING:

- 90X ANTI-FOG
- 2X SCRATCH RESISTANCE
- IN EXTREME ENVIRONMENTS, ANTI-FOG PERFORMANCE AND DURABILITY ARE REQUIRED TO KEEP WORKERS PROTECTED. UVEX LIVEWIRE® SEALED EYEWEAR DELIVERS ON ALL COUNTS.

* Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application. Anti-fog performance based on independent lab test results.

FIT & COMFORT

In high-particulate environments that require sealed eyewear, a proper fit is absolutely critical.

- Through extensive research and fit-testing on hundreds of workers, Uvex Livewire® Sealed Eyewear sets the bar for achieving a proper fit on even the hardest to fit individuals.
- Smooth surface and density of foam are designed to minimize pressure against the skin.
- Contoured design minimizes bulk for superior comfort and enhanced line of sight.

- Precise placement of vents ensures air circulation while minimizing gaps.
- The curvature of browbar is optimized based on morphological data to fit a large number of wearers.
- Flexible design can be worn with temples like a spectacle or with the headband like a goggle depending on the application.
- Simple temple-to-headband exchange system makes switching between temples or headband quick and easy.

- Streamlined, wraparound frame design accommodates respirators and other PPE, while the low-profile temples fit comfortably with earmuffs.
- Ratchet, adjustable temples, lens inclination angle by up to 15% for the best fit.
- Padded temples are engineered to provide ideal tension and flex for superior comfort and fit.
- Cloth headband is latex free.
- Meets ANSI Z87.1.
- 100% dielectric.
- Not for chemical splash applications.

EYEWEAR FEATURES

1. Upper channels in the frame for optimal venting and enhanced anti-fog performance.
2. Side channels in the frame for optimal venting and enhanced anti-fog performance.
3. Available in HydroShield® Anti-Fog for consistent fog-free 90X longer than the majority of other anti-fog products and 2X scratch resistance.
4. Precision-design foam subframe fits contours around the eyes to maximize fit and comfort.
5. Ratchet temple for added fit.
6. Padded temples provide ideal tension and flex for optimal comfort and fit.
7. Offered in black and in the widest assortment of lens tints utilizing Uvex Spectrum Control Technology® (SCT) lenses. Available in Clear, Amber, Espresso, SCT-Reflect 50 (indoor/outdoor mirror), SCT-Gray, SCT-Low IR – from low light, to glare, to infrared protection, there's a Uvex Livewire lens for the job.

Temple tips

CHOOSE THE HONEYWELL UVEX LIVEWIRE® STYLE THAT SUITS YOUR NEEDS BEST!

Clear
Ideal for most indoor work applications

SCT-Gray
Minimizes outdoor glare and offers true color recognition

Espresso
Minimizes strong outdoor sunlight and glare

SCT-Low IR
When peripheral IR protection is required

Amber
Ideal for low-light applications where enhanced contrast is needed

SCT-Reflect 50
Light mirror coating is ideal for varying light conditions

Uvex LiveWire® Sealed Eyewear comes complete with removable temples and headband.

ORDERING INFORMATION

SKU	DESCRIPTION
S2600HS	UVEX LIVEWIRE BLK CLR HSAF
S2601HS	UVEX LIVEWIRE BLK ESP HSAF
S2602HS	UVEX LIVEWIRE BLK AMB HSAF
S2604XP	UVEX LIVEWIRE BLK REF50 XT+
S2605HS	UVEX LIVEWIRE BLK SCTGYHSAF
S2609HS	UVEX LIVEWIRE BLK LOWIR HSAF

Packaging Information: (Eyewear) Ind. box, 10/stocker, 200/case

Case Weight: 35.6 lbs.

Case Dimensions: 29" x 15" x 24"
