UVEX

HIGH PROTECTION

THE ULTIMATE COMBINATION OF PROTECTION AND STYLING

Honeywell Uvex Hypershock® eyewear delivers the ultimate combination of high-performance protection and aggressive sport-inspired styling.

The lightweight, wraparound full frame design offers high impact protection, with streamlined padded temples and a molded nosepiece for a secure, comfortable fit.

Honeywell Uvex Hypershock is available in high-performance HydroShield® Anti-Fog coating and offered in three frame colors and a wide variety of specialized tints, including the transitional, Photochromic lens.

AVAILABLE WITH HYDROSHIELD ANTI-FOG COATING

Hypershock is available with HydroShield® Anti-Fog coating to provide lenses with consistent fog-free protection 90x longer than the majority of other anti-fog products. And it provides 2x better scratch-resistance* than our next best coverage.

HydroShield® Anti-Fog coating is permanently bonded to the lens, featuring dual-action properties even after extended wear and repeated cleanings, and requires no application and no maintenance.

* Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application. Anti-fog performance based on independent lab test results.

HONEYWELL UVEX HYPERSHOCK® VARIETY OF SPECIALIZED LENS TINTS

This stylish “Safety-Sunwear” model is offered in a variety of lens tints, including polarized and the transitional, Photochromic lens.

HYPERSHOCK WITH PHOTOCROMIC LENS

- Honeywell vex Hypershock® with Photochromic lens offers versatile, sleek, rugged design that transitions from light to dark
- The lens darkening is noticeable within 15 seconds and lens lightening in 60 seconds
- The Hypershock Photochromic lens is offered with matte black or clear frames and available with Uvextreme® Anti-Fog coating
- Ideal for oil and gas, construction, landscaping, utilities, and manufacturing applications
- 100% dielectric. Can be worn in environments where accidental exposure to electrical charge is possible
- Meets the ANSI Z87.1 standard
