

SwiftCAF™

Portable Compressed Air Foam System

Intelagard is pleased to introduce the SwiftCAF product line. At last, complete versatility in a compact and powerful Compressed Air Foam module. The SwiftCAF provides unique advantages in mobility and is the ultimate tool for providing CAF capability in a wide range of configurations. Utilized in the All Terrain Vehicle package (SwiftCAF ATV system pictured bottom left), the SwiftCAF provides the power of independence and mobility over rough terrain.

Adding the SwiftCAF to any brush or pumper truck is a snap with the incredibly compact size of this CAF unit. Measuring only 11 x 7.5 x 4.5 inches, the SwiftCAF easily fits in the tightest of compartments. The unique quick mounting platform allows you to take this CAF capability with you to the remotest of areas and generate CAF from the energy of an SCBA cylinder!

The SwiftCAF is ideal for most portable applications due to its lightweight, minimum space requirement and self-contained energy source. The SwiftCAF is perfectly suited for rapid incident attack or response, especially for use in restricted access emergency situations and cross country, off-road and rugged terrain situations.

As with all Intelagard products, the SwiftCAF has been tested under rigorous conditions. It is designed for multi-hazard response and is durable, easy to use and requires minimal maintenance.

The SwiftCAF may be used with all classes of fire suppression foams, HAZMAT remediation foams, and CBRN decontamination formulations.
