

ON-BOARD INTELLIGENT BATTERY CHARGER

EUROCHARGER I

AUTOMATIC BATTERY CHARGER FOR SINGLE BATTERY SYSTEMS

**FOR THE SPECIFIC NEEDS OF
EMERGENCY VEHICLES**

SUPPORTS PARASITIC LOADS

LOW FREQUENCY – LOW NOISE

**RUGGED CONSTRUCTION FOR VEHICLE
MOUNTING**

**INPUT VOLTAGE SELECTABLE, 115 OR
230 VOLTS**

DESIGNED TO CE REQUIREMENTS

MODEL 091-90T

The Euro Charger I is a fully automatic battery charger designed to meet CE requirements.

Ruggedly constructed with a single output, it float charges the battery and may be installed on the vehicle. Extremely precise voltage control maintains the charger output constant with variations in load or line voltage input. Active current limiting limits the output current so as not to exceed its rated value when charging deeply discharged batteries or if the vehicle is started while charging.

Two unique remote displays are available as options for this charger. One provides a simple, 2 LED display. A green LED indicates that power is ON while a red LED indicates that output current is flowing from the charger. A second display, a single bar graph, provides a graphic display of the charger output voltage.

MODEL #	091-90T-12	091-90T-24
VOLTAGE IN	115V OR 230V AC 50/60HZ	
CURRENT IN	2.6A OR 1.3A	
VOLTAGE OUT	12V	24V
CURRENT OUT	15A	8A
INDICATOR	SEE BELOW	
WEIGHT	4.1KG	
OUTLINE	030	

OPTIONAL REMOTE DISPLAYS

BAR GRAPH DISPLAY

LED INDICATOR
