

TIME DELAY RELAY 1

AUTOMATIC TIME DELAY RELAY

MODEL 092-2004-XX

TIME DELAY ON, TIME DELAY OFF, OR BOTH
 ADJUSTABLE TIME RANGE 0 SECONDS TO 9
 HOURS IN HALF-SECOND INCREMENTS
 WORKS ALONE OR WITH OTHER CANPOWER
 UNITS
 VERY LOW POWER CONSUMPTION
 AVAILABLE FOR 12 OR 24 VOLTS
 EASY TO INSTALL

A member of the CANpower family, this unit can be installed as a stand-alone component, or can be connected to other CANpower units by CAN bus to run in tandem with them.

Easy to install standard unit comes with default settings, which will suit most applications. Fully installer programmable with very simple free software through the optional interface unit.

This advanced digital Time Delay Relay can be used to delay items switching on, or delay items switching off, or both. Easy to install and fully installer programmable with very user-friendly software through the optional interface unit. Standard unit comes with default settings.

Extremely low current drain makes this valuable in applications where battery failure can be an issue.

The unit can also run external relays

Typical Applications:

Police car radio - can flatten the battery in hours, disabling the car. This unit switches the radio off after a pre-set time period after stopping the engine.

Fire appliance locker/interior lights - switch off automatically after a pre-set time delay after stopping the engine.

Lighting Mast Floodlights - are delayed in switching on for a pre-set period from starting engine to allow alternator to achieve full output before going under load.

MODEL #	OUTPUT	VOLTAGE
092-2004-12	30A	12V
092-2004-24	30A	24V
