

# Garden Center Reels

Spring Retractable

New Product Announcement

## DESCRIPTION

These reels are designed to be mounted centrally and used for watering and washdown. They offer longer lengths of larger I.D. hose, are spring driven, and come equipped with garden hose end fittings (designated by an NH). Most featured models\* include hose, bumper and inlet hose, providing a reel solution out of the box.

\* 7850 OLPSW57 Does not include inlet hose

## BENEFITS

- **Long Spring Life** Spring is made from high quality spring steel and conditioned to remove imperfections.
- **Structural Strength** Reel components are made from industrial grade steel and ribs are added to give added stability.
- **Ease of Use** Guide arm is easily adjustable to numerous positions. Hose bumper maintains desired working hose length.
- **Corrosion Resistant** Parts are individually powder-coated for high quality, uniform paint adhesion. The result is a brilliant abrasion/corrosion resistant finish that keeps these reels looking new through years of use.
