New Product Announcement | REELSAFE® Series RS7000

Heavy Duty Spring Retractable REELSAFE® Hose Reels

The new REELSAFE® Series RS7000 is an expansion of the rugged design that set the industry standard. With safety at the forefront, REELSAFE® pays out like a traditional reel, though is specifically engineered to retract the hose at an average walking speed. The centrifugal clutch, integral to the reel base, greatly **decelerates the** hose retraction speed by up to 83% vs. a Series 7000 reel.

- Retracts at 2 miles per hour designed to match the average human walking speed of 2 to 3 miles per hour
- Integral clutch creates a consistent retraction speed regardless of fluid or environmental temperatures
- Safely protects personnel and equipment
- Requires no field adjustment
- Thru-shaft fluid path eliminates hose interference during reel rotation and increases swivel life
- 7 position hose guide arm for multiple mounting configurations
- Reel dimensions and mounting pattern identical to the Series 7000

Hose Reels

Model with hose		Shipping Weight		Hose I.D.		Hose O.D.		se gth	Max Pressure		NPT(M) Hose Outlet	NPT(F) Reel Inlet	Model without hose	Shipping Weight		Max Pressure		Size Inde
