

New Product Announcement | Series UR

DEF Dispensing Reels Series UR

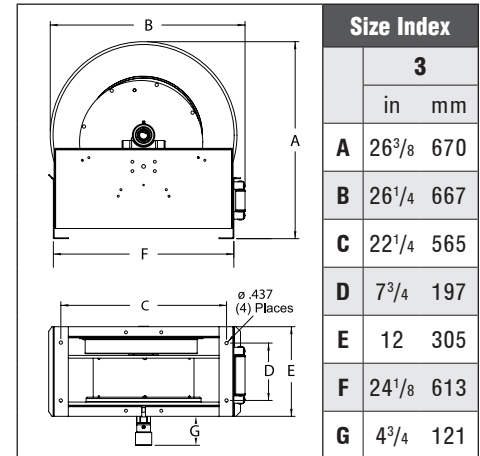

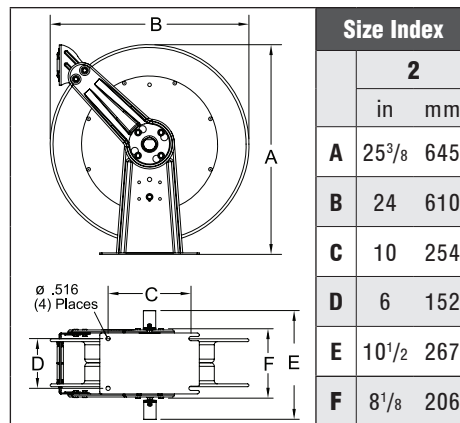

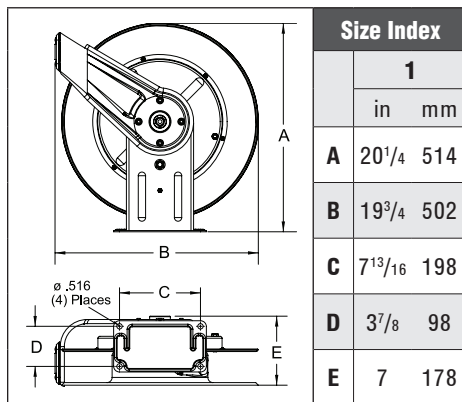

Reelcraft introduces its DEF dispensing line of spring retractable hose reels. Designed to aide in the dispensing of Diesel Emissions Fluid (DEF) for late model diesel engines, these reels are an integral part in emerging DEF service stations in marinas, truck stops and garages.

Benefits

- **Corrosion Resistant** - Internal fluid path parts are made from 304L grade stainless steel and features Viton o-rings. Carbon steel parts receive a uniform polyester powder coat prior to assembly.
- **Integration** - We offer National Pipe Thread fittings as well as British Parallel to ensure that the reel will integrate with other components of your DEF system such as, nozzles, pumps and meters.

UR7925 OLB

- Designed for dispensing DEF or Diesel Emissions Fluid (AUS32, Aqueous Urea Solution)
- Gasketed spring case
- Goodyear DEF dispensing hose and adjustable bumper included (on models with hose)
- Viton® o-rings
- 316 stainless shaft and Super Swivel®
- Reels constructed from industrial grade carbon steel or 304L stainless steel (optional)
- High quality stainless steel hose ferrules
