

724 VR2

The 724 VR2 is a Positive Pressure Ventilation (PPV) fan that features a 24" cast aluminum airfoil blade and a variable speed electric motor.

The 724 VR2 has solid cushion tires for easy transportation and a step brake that locks both wheels into position. The precision spun steel shroud is adjustable to four angle positions. A steel frame, full roll cage design and heavy gauge steel grill ensure safety and durability of the 724 VR2.

The VR2 provides precise control of air movement and up to 30% more air flow than single speed electric PPVs. Full control of fan speed with the ability to run on GFCI circuits make these units highly versatile.

Specs

Motor.....	1.5 Hp
HxWxD.....	27.75"x29"x20.5"
Fan Diameter.....	24"
Weight.....	109 lbs
Start.....	2000 watts
Run.....	1500 watts
RPM.....	2400
Set Back.....	6 ft
Angle.....	18°
CFM.....	15,875
