

# 724 VR3

---

The 724 VR3 is a Positive Pressure Ventilation (PPV) fan that features a 24" cast aluminum airfoil blade and a variable speed electric motor.

The 724 VR3 has solid cushion tires for easy transportation and a step brake that locks both wheels into position. The precision spun steel shroud is adjustable to four angle positions. A steel frame, full roll cage design and heavy gauge steel grill ensure safety and durability of the 724 VR3.

The VR3 provides precise control of air movement and up to 35% more air flow than single speed electric PPVs. The VR3 is the only variable speed fan in the industry that will run on GFCI circuits and new hydraulic generators without surging at high speed.
