ABOUT THE TWISTER SERIES

The Twister is available as a selectable, dual gallonage, combination nozzle and a fixed flow 95 gpm flow rate. Designed for simplicity and durability, the rubber bumper provides a positive grip and protects the front end. Twisting the shaper from the off position produces the following settings: low flow straight stream, low flow narrow fog, high flow straight stream, and high flow fog. The rugged, economical nozzle also accepts the FoamJet multi-expansion foam aspirating attachment.
