ABOUT THE EDUCTOR SERIES

In line foam eductors have a metering head with an easy-to-read knob for use with Class A, B and AR-AFFF foam at a variety of percentages. The meter head is equipped with a unique back flush push-button for fast and easy cleaning right on the scene, and is secured to the eductor body with a rugged disconnect. All controls are easy to use with gloves. The eductors are made of hardcoat anodized aluminum for corrosion protection.

- 125 Eductor Series are available in 60, 95, or 125 gpm models and have foam percentage settings of .25 %, .5 %, 1 %, 3 %, & 6 % allowing use with Class A or B foams. Models allow you choose between an extra-large 36" pickup hose with stainless steel wand or direct truck connect pickup hose.
- 250 and 350 Eductor Series are 250 gpm and 350 gpm in line Foam eductors for use with Class A foam or Class B foam. A large 8' industrial grade, UV resistant pickup hose is ideal for use with high viscosity foams.
