

EXTEND-A-GUN Series

CROSSFIRE/EXTEND-A-GUN PACKAGE

XFC-71

CROSSFIRE/X-GUN/BRACKETS

\$3760.00 List Price
FEATURES

Rated to 1250 gpm(4500 l/min), the Crossfire® is a portable ground monitor and/or deck mounted monitor. The Crossfire® monitor top with hand wheel provides elevation control from 90° to the safety stop at 30° above horizontal, and is capable of lower elevation angle when truck mounted. The STOW-AWAY® portable ground base is available with twin 2-½" (65 mm) clappered inlet, or single large diameter inlet. Optional pressure relief valve and slow close valve (single inlet models only). Includes a set of quad stacked tips and your choice of a 1,000 or 1,250 gpm (4,000 or 4,500 l/min) Masterstream nozzle. "-NB" at the end of the part number designates Mounting Bracket is NOT included

SPECIFICATIONS

Finish	Fire Engine Red
Horizontal Control	Lock Lever
Horizontal Movementdegrees	270 total range
Inlet	Quick Connect Female
Max Flow	1,250 gpm (4,500 l/min)
Operation Energy Source	Manual
Outlet	2.5" (65 mm)
Package	Yes
Remote Control	No
Vertical Control	6" Handwheel
Vertical Movementdegrees	90 to 90
Waterway	3" (75mm)
Weight	0

ABOUT THE EXTEND-A-GUN SERIES

The Extend-A-Gun series provides new capabilities for your deck mounted Master Stream device. For storage, it can be lowered to deck level (or even into a monitor well). On the fire ground, the monitor may be raised to its extended position 12 or 18 extra inches (30.5 or 45.7 extra cm) above the trucks pump housing. The Extend-A-Gun offers a hardcoat anodized finish, and built-in sensor for connection to “monitor raised” light or truck open compartment warning. It can be specified with new, or retrofitted to existing apparatus.

Models include a manual version with a 3” (75mm) waterway or a remote control version with a 3” or 4” (75mm or 100mm) waterway, and the VP version which offers a complete solution from TFT: monitor, nozzle, waterway, and valve! Deploy and stow operations are efficiently controlled by pneumatics and the inlet valve interlock system aids safe operations. Designed to flow up to 1,500 gpm (6000 L/min), choose from a variety of TFT monitors.
