ABOUT THE MONSOON SERIES

The MONSOON is available in a manual or electrically controlled model in two versions: up to 1250 gpm (4750 l/min) or up to 2000 gpm (7600 l/min). With a unique patented segmented waterway, the water makes very few turns as it travels through the monitor resulting in low friction loss and a far-reaching effective stream. There are RC models specifically for pumpers or aerial apparatus with a wide range of controller, nozzle and EXTEND-A-GUN options.
