# STAGE-ONE Decon

The new Stage-One Decon Shelter from ZUMRO is a rapid deployed pre-plumbed single user Shower Unit specifically designed for Gross Decon.

While designed as a “stand alone” unit, this Shelter has a unique “Link-Up” feature. Both the Canopy and the Containment Pool can be connected to form a multi-stage shower system if so desired. The Stage-One Decon unit can also be linked to any size ZUMRO Shelter with the optional Connector Transfer Panel. This enables full inter-operability with existing ZUMRO Systems.

The Inner Replaceable Canopy is pre-assembled to a “ZUMRO Quality” Inflatable Frame, strong enough to withstand high winds and designed to last for decades.

The Integral Containment Pool and Base utilizes ZUMRO’s patented built-in Elevated Shower Platform.

Color coded dual-line Shower Hoses and Drain Hose are pre-plumbed in the unit.

Shown here with a 6 GPM surround shower system, various shower hardware can be connected to two additional water connections.

## STAGE-ONE Decon FEATURES:

- ◆ Deployed in 30 Seconds.
- ◆ Fully Pre-assembled Shelter.
- ◆ Pre-Plumbed for multiple Showers.
