

Euralarm Announces Global Safety And Environment Technology Firm, Halma Plc. Added To Its Fire Section

Published on 16 Apr 2019

Following a decision of its Board, Euralarm has welcomed its newest member Halma plc. The company will join the Fire Section of Euralarm.

Halma will now benefit from Euralarm's services in terms of representation towards European institutions and standardization organizations. This includes the monitoring of legislative and standardization issues relevant to the industry. Halma will have access to the extended

network of national associations and major companies in the electronic fire safety and security sectors, which form Euralarm's members. The new membership will create opportunities for both sides, as it also strengthens the association. The Fire & Security Division provides products that protect both lives and property

Fire Detection And Alarm Systems

Halma plc is a global group of technology companies with the aim of growing a safer, cleaner, healthier future for everyone, every day. The Fire & Security Division provides products that protect both lives and property. Within the fire detection & alarm sector these products include wired and wireless fire detection (smoke, heat, gas, multi), audible and visual warning devices, beam and flame detectors, single or networked control and indicating systems. In the field of security, the company offers wired and wireless security product solutions covering applications from small residential to large commercial premises.

Gaining Vital Knowledge On Markets

Companies joining Euralarm get a unique insight into what is happening in other European markets and the opportunities that they might offer. They not only tap into the political expertise and in-depth understanding of the EU policy but can also make personal connections with technical and political experts, along with potential business partners.

Being a member of Euralarm enables companies and associations to gain vital knowledge and expertise on standardization. Members have their voice heard in Brussels and can support and direct standardization and legislative processes.
